-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1652

Applicant's election without traverse of Group V, claims 125-144 in the reply filed on 8/30/05 is acknowledged. All of the other pending claims have been deleted. Election was made **without** traverse in the reply filed on.

Claims 129, 134, 139-140 and 144 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 129, 134, 139 and 144 are confusing in the recitation of "including movement...including sleep...including temperature...including schizophrenia..." The instant recitations are apparently intended to go with the disorder immediately preceding it but all of the recitations are separated by commas, which does not make this apparent intention clear. Applicants should use both commas and semi-colons, indentations, or some other method of making the intentions of the instant claim clear.

Claim 140 is indefinite in the recitation of "said nucleic acid" in line 3. The term has no antecedent basis.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 125-144 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 1652

The instant specification teaches that the cDNA of SEQ ID NO:1 encodes the human choline acetyltransferase shown in SEQ ID NO:2. The specification does not teach that the level of SEQ ID NO:1 or 2 in "a patient" indicates that there is any "disorder" in the patient, and certainly not that the disorder involves the disorders listed in the instant claims. There is nothing in the instant specification that teaches that any level of increase or decrease in SEQ ID NO:1 or 2 causes a disorder nor what that level of increase or decrease is. Therefore it is maintained that the instant specification does not enable one of ordinary skill in the art to practice the claimed invention.
